Basic Information:

- Date: 1/13/2025
- Position: **Global Internship Program**
- Location: Minato-ku, Tokyo
- Salary: Unpaid
- **Language:** Basic Japanese level
- No professional experience required

About the position

Join us for a unique 4-6 weeks of tech internship in our Shibuya office, offering you both personal and professional development opportunities. Experience working onsite in a Japanese company that prides itself on cultivating an internationally diverse culture.

Requirements

- At least third-year students or fresh graduates with BS, MS or PhD in Computer Sciences or a related field
- Knowledge of Unix / Linux environments
- Programming experience in any language
- Willing to participate in the internship in person at our headquarters in Shibuya, Tokyo, Japan

Nice to haves

While not specifically required, tell us if you have any of the following.
- Interested in pursuing a career in Japan
- Interested in Cloud Computing
- Proficiency with Python or Go
- Knowledge of distributed systems
- Experience in Full-stack Web Application development

Compensation

While this is an unpaid training program, we do provide some financial support:
- Round-trip airfares from and back to your country of residence
- Medical insurance (for interns who do not reside in Japan) and a phone with mobile data will be provided during your internship in Tokyo, Japan
- Monthly subsidy to cover accommodation, meals, transportation, and networking activities

These additional benefits are also included:

- Getting insights into how a leading Cloud Security company develops its product from start to finish
- Experience developing web applications and understanding of how to deploy a web application natively on a cloud platform
- Pre-arrival support and visa guidance
- Company events (Monthly Technical Sessions, Board Game Night, and many others!) and get to know teams across divisions
- Access to online learning platform

Hiring Process

- HENNGE Admission Challenge: The coding challenge has no time limit, and the screening process will not consider solving time.
- Screening process: We'll review your CV and cover letter.
- Phone screening
- Online interview
